SUMMARY

Java Full Stack developer who has taken two applications from scratch to production — Spring Boot, PostgreSQL/MySQL, React, and a Gemini-based RAG pipeline for one of them. Comfortable across the stack: writing REST APIs, wiring up JWT auth, fixing frontend-backend mismatches, and getting things actually deployed and working rather than just running locally.

TECHNICAL SKILLS

Languages & Core: Java, Python, OOP, Exception Handling

Frontend: HTML, CSS, JavaScript, React.js

Backend: Spring Boot, Spring Security, Spring Data JPA, REST APIs, JWT, API Design & Integration

Database: MySQL

AI/LLM: Retrieval-Augmented Generation (RAG), Prompt Engineering, Google Gemini API

Tools & Practices: Docker, Git, Render, Vercel, Postman, JUnit, Mockito, Agile/Scrum, SDLC

EXPERIENCE

Software Development Intern — BIST Technologies Pvt. Ltd.

Feb 2026 – May 2026

Vijayawada, Andhra Pradesh

- Built a journal entry module with 6 REST endpoints (CRUD + user-filtered GET), validating titles and date fields.
- Fixed a PUT/PATCH mapping conflict on /entries/{id} causing intermittent 400s; separated mappings to resolve.
- Designed a MongoDB schema (userId, title, content, timestamp, tags) and wrote filtered repository queries via Spring Data.
- Built a 25+ request Postman collection covering CRUD flows, edge cases, and status validation pre-merge.
- Managed feature branches in Git; resolved merge conflicts integrating controller changes with a teammate.

Python Development Intern — Twilearn EduTech Pvt. Ltd.

Sep 2025 – Dec 2025

Remote

- Cleaned a ~15K-row sales dataset: fixed mixed date formats, ~400 duplicate order IDs, and nulls (median-imputed).
- Wrote SQL joins across order/customer tables, filtering test accounts and refunds pre-analysis.
- Plotted revenue trends in Matplotlib; traced a 20% regional dip to a currency data-entry error, not a real sales drop.
- Fixed mistyped numeric columns (strings with currency symbols) via regex + astype(float), caught via total cross-checks.

PROJECTS

Kinukollu — AI-Powered Civic Assistant ([Demo](#) | [Backend](#))

AI assistant that explains constitutional rights and matches users to government schemes using retrieval-grounded LLM responses.

Java 21, Spring Boot 4, Spring Security, PostgreSQL (Neon), React, JWT, Google Gemini API, Docker, Render, Vercel

- Implemented JWT auth with BCrypt hashing and a custom Spring Security filter chain for stateless, route-level access control.
- Built a RAG pipeline using Gemini embeddings and cosine similarity search to ground LLM responses in a curated knowledge base.
- Designed prompts with strict grounding rules and fallback responses to prevent fabricated answers when data is missing.
- Deployed backend (Docker on Render) and frontend (Vercel) with environment-based config and auto-deploy on GitHub push.

FoodForAll — Food Waste Distribution System ([Demo](#) | [Backend](#))

Connects food donors with NGOs to reduce food waste through real-time donation tracking.

Java, Spring Boot, Spring Data JPA, MySQL (Aiven), React, Docker, Render, Vercel, JUnit, Mockito

- Designed the relational schema and REST APIs, enforcing claim rules to prevent double-claims and expired pickups.
- Deployed to production via Docker and Render, backed by a live MySQL database on Aiven.
- Diagnosed and resolved production database connectivity and JSON serialization failures independently.

Implementation of Quantum Key Distribution with Classical Algorithms ([Paper](#))

Simulates secure quantum-based key exchange resistant to eavesdropping detection.

Python, Qiskit, Qiskit Aer, SHA-256

- Simulated the BB84 protocol for quantum key exchange with real-time eavesdropping detection, and generated secure keys using SHA-256 hashing.
- Findings published in a peer-reviewed journal (IJERT).

EDUCATION

B.Tech, Electronics and Communication Engineering — Acharya Nagarjuna University

2022 – 2026

CGPA: 7.2

Higher Secondary School — NRI Junior College

2020 – 2022

Percentage: 83%

CERTIFICATIONS & ASSESSMENTS

- TCS iON National Qualifier Test (NQT) — 75.86% overall (2026)
- Introduction to Internet of Things — NPTEL, 90% (2025)
- Foundations of Prompt Engineering — AWS Training and Certification (2026)
- Data Analytics Job Simulation — Deloitte (2026)
