SUMMARY

Java developer with hands-on experience building CRUD applications and REST APIs using Spring Boot, backed by internship exposure across the full SDLC. Applies strong algorithmic foundations (100+ problems solved on CodeChef) to writing clean, maintainable backend code. Comfortable working across the stack — Java, SQL, and JavaScript/React on the frontend — with production-oriented practices such as Git version control.

TECHNICAL SKILLS

Programming: Java

Frontend: HTML, CSS, JavaScript, React.js

Backend: Spring Boot, REST APIs

Database: MySQL

Core Concepts: Object-Oriented Programming, Exception Handling, Data Structures & Algorithms

Tools: VS Code, Git

EXPERIENCE

Software Development Intern — BIST Technologies Pvt. Ltd.

Feb 2026 – May 2026

Vijayawada, Andhra Pradesh

- Contributed to software development tasks across the full SDLC, from requirements through deployment.
- Diagnosed and resolved defects in existing codebases, strengthening debugging proficiency.
- Applied standard software engineering practices in a collaborative team environment.

Java Full Stack Development Intern — Elearn Infotech

May 2026 – Present

Hyderabad, Telangana

- Built RESTful APIs and CRUD modules using Java and Spring Boot, integrated with MySQL databases.
- Developed full-stack features connecting Java/Spring Boot backends with HTML, CSS, and JavaScript frontends.
- Applied OOP principles and exception handling to write maintainable, production-oriented code.

PROJECTS

Implementation of Quantum Key Distribution with Classical Algorithms

Python, Qiskit, Qiskit Aer, SHA-256

- Simulated the BB84 Quantum Key Distribution protocol using Qiskit, implementing secure key exchange between parties.
- Engineered eavesdropping detection logic to validate channel security.
- Generated encrypted communication keys using SHA-256 hashing.

Brain Tumor Detection Using Microstrip Patch Antenna

MATLAB

- Designed and simulated a microstrip patch antenna for non-invasive brain tumor detection.
- Analyzed antenna performance parameters, including S11, gain, and radiation pattern.
- Evaluated simulation results against target specifications to validate detection feasibility.

EDUCATION

B.Tech, Electronics and Communication Engineering — Acharya Nagarjuna University

2022 – 2026

CGPA: 7.2

Higher Secondary School — NRI Junior College

2020 – 2022

Percentage: 83%

CERTIFICATIONS

- Introduction to Internet of Things — NPTEL (2025)
- Foundations of Prompt Engineering — AWS Training and Certification (2026)
- Data Analytics Job Simulation — Deloitte (2026)

ACHIEVEMENTS

- Solved 100+ Java programming problems on CodeChef.
- Achieved 90% in the NPTEL Introduction to Internet of Things certification examination.
